70% Redution in heating costs
 50% Redution in electricy costs
 70% Redution in chemical use

Fabric & Webbing

The Coverstar fabric is incredibly strong and durable. An advanced vinyl formulation and superior fabrication methods make it top of the line. No other automatic safety cover manufacturer offers all these exclusive features:

Specially formulated heavy-duty vinyl fabric utilizes extruded coating process and closed polyester weave for superior product performance.

- Ultraviolet Protection
- Chemical Resistance
- Mildew Resistance
- Fabric Strength (17 oz)
- Tear Resistance
- Abrasion Resistance
- Minimal fabric shrinkage (less than 1%)
- Exclusive Color-Match Heat-Sealed Webbing
- 9 standard colors (custom colors also available)

Color Matched Cover Webbing

Our exclusive color matched webbings are an aesthetically pleasing option and are even longer lasting than white webbing due to color pigments that reduce UV light exposure to the fabric.

Exclusive Heat Sealed Webbing

Most automatic safety pool cover manufacturers wrap webbing material around rope and sew it to the cover. Unfortunately, with this attachment method the webbings often fail before the fabric does. (see photo, far right). To solve this problem we invented and patented a process whereby the rope is replaced with a flexible polymer bead and the webbing is heat seal bonded to the cover fabric in one step. This patented process is a substantial improvement over the common webbing attachment method and provides substantially longer webbing life and improved operation of the cover.

Guide options:

Underguide systems are embedded in the pool wall or mounted to the bottom side of rectangular pools' coping, allowing guides to remain virtually unnoticed. For a more integrated look, guides can be built directly into the pool wall using guide encapsulation.

Topguide systems can be used with most freeform pools. The cover's drive system is installed under an aluminum lid or mounted to the surface of the deck.

Recessed guide systems feature aluminum guides that are recessed in the pool deck during the construction of the pool. The recessed guide is flush with the top of the deck.

Underguide Encapsulated Underguide Topguide Slim Flush Guide

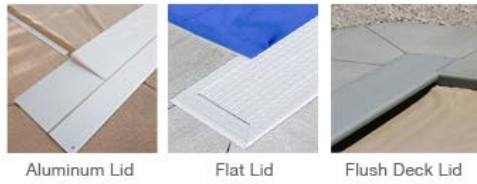

Lid options:

Classic Aluminum Lid, Flat Lid, Flush Deck Lid, Walk-on Lid

Powering Your Automatic Pool Cover

- Inexpensive Ways to Heat Your Swimming Pool – Pool Covers!

Coping options:
