

Automatic safety cover options for every customer

All Coverstar automatic safety covers offer the following:

**Choice of nine standard fabric colors:**

Many other custom colors and fabric weights are also available.

Guide options:

**Underguide systems** are embedded in the pool wall or mounted to the bottom side of rectangular pools' coping, allowing guides to remain virtually unnoticed. For a more integrated look, guides can be built directly into the pool wall using guide encapsulation.

**Topguide systems** can be used with most freeform pools. The cover's drive system is installed under an aluminum lid or mounted to the surface of the deck.

**Recessed guide systems** feature aluminum guides that are recessed in the pool deck during the construction of the pool. The recessed guide is flush with the top of the deck.
