OZONE + UV POOL SANITATION

Ozone and Germicidal UV Working Together to Create Advanced Oxidation - A Revolution in Residential Pool Water Purification

- *Safe, Sustainable, Low-Cost Pool Sanitation*
- *Maximized Disinfection, Clarity and Chloramine Removal*
- *DEL Ozone Exclusive Plasma Gap Ozone Technology*
- *Integrated Trident Germicidal Ultraviolet Technology*

A Synergistic Sanitation Approach

When ozone and germicidal UV are combined in a single system, the UV light interacts with the ozone, and the resulting chemical reaction generates hydroxyl free radicals. Hydroxyl free radicals have even more oxidation potential than ozone, the power of the whole system is increased; creating the synergy of Advanced Oxidation Process (AOP).

SPECIFICATIONS	SOLAR ECLIPSE
Application	50,000 gallons or less
Plumbing Connections	Inlet and Outlet 2 inch PVC Unions
Flow Rate	Maximum 80 GPM
Mounting	Floor or Wall Mount
Enclosure Rating	Outdoor Installation
Electrical Rating	240 VAC, 60 HZ - 0.4 Amps
Size	12" x 26" x 17"
Weight	38 lbs.
Listings/Certifications	UL, cUL
Germicidal UV Lamp Life	Replace Lamp after 13,000 Hours
Ozone Cell Life	5 Year Life Expectancy
Warranty	2 Years
