Congratulations on your purchase of Balboa's Worldwide App (bwa™) kit. With this kit, you can escape from your daily disruptions and set your tub just like the way you like it for that relaxing moment when you arrive home.

The Balboa Worldwide App (bwa™), is an app for your smart device (Android™ or iPhone®) that allows you to access your hot tub via a direct connection anywhere in the local proximity of your tub, anywhere in your house that you can connect to your local Wi-Fi network, or anywhere in the World you have an Internet connection to your smart device via 3G, 4G, or Wi-Fi hot spots*.

The app provides full interface control so you can set the temperature, turn pumps on and off and even set filtration cycles.

You can access your tub from the comfort of inside your home, your office before you leave work, or on your way back from your get-a-way holiday.

You can set your own mood and personal settings, so your tub is set to how you like when you arrive.

* Check with your carrier for Internet charges as the bwa app transmits data to & from a server and depending on your data plan, you may experience additional monthly data charges.

What You Need

An Android™ level 2.3 or later, or iPhone® iOS® 5 or later

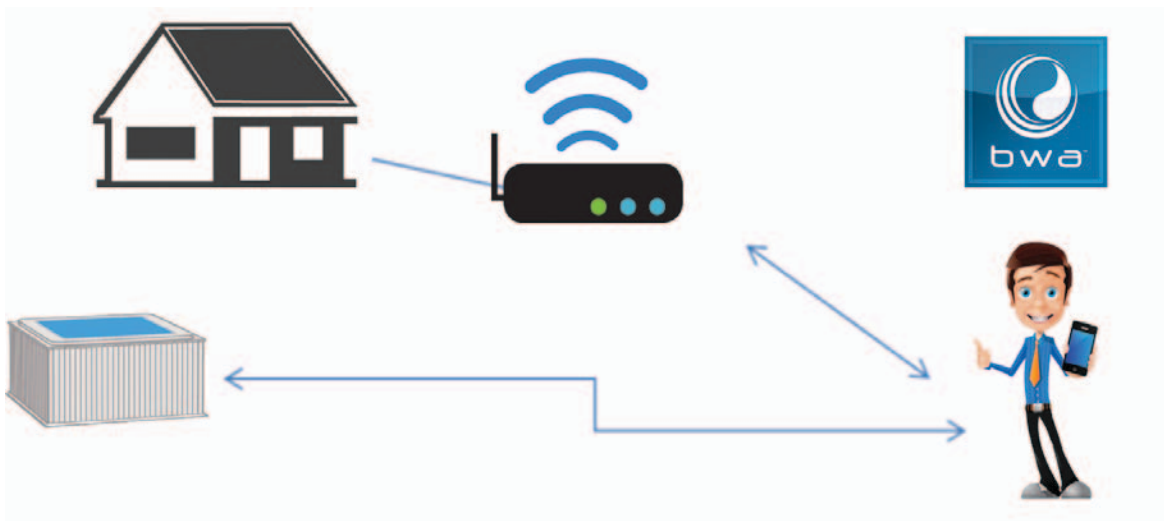

A Hot Tub Equipped with a Balboa BP System (check with your dealer)

And a local home Wi-Fi network with Internet access

The smart device should have Wi-Fi access and optional access to a cellular 3G or 4G data network. Your tub should be installed in an area that you have local Wi-Fi network coverage and can connect to it.

Install the bwa™ Wi-Fi Module

Power off the tub. The tub must be powered off for the Wi-Fi module to initialize properly.

If your tub has been pre-installed with a Wi-Fi connection cable, open the equipment compartment and plug the bwa module into it.

If it has not, you should contact your dealer or a professional spa technician to open the control pack and to plug the bwa module into the appropriate connector. There is High Voltage in the pack and the possibility of electrocution.

Once connected, power the tub back on.
